WORK EXPERIENCE

Sevael Technologies

Full Stack Developer

Jul 2025 - Present

- Client : *Yanmar*

Project : Supply Chain Management (SCM)

SCM is a web-based application that streamlines supply chain operations by managing orders, tracking inventory, and automating workflows. It improves visibility, efficiency, and collaboration across suppliers, customers, and internal teams.

Key Responsibilities:

- **Full-Stack Development:** Built and maintained SCM using JavaScript (React.js), Tailwind CSS and Redux, ensuring responsive and efficient UI.
- **Workflow Automation:** Designed order and inventory management workflows to streamline supply chain operations.
- **Real-Time Tracking:** Implemented logic for automated order status updates and inventory tracking.
- **API Integration:** Integrated third-party APIs for supplier/customer data exchange and secure document handling.
- **Testing & Optimization:** Collaborated with QA to validate features, fix defects, and enhance system performance.
- **Agile Collaboration:** Used Git, GitHub, and JIRA for version control, collaboration, and task tracking in a Scrum environment.
- **CI/CD & Deployment:** Automated builds and deployments with Jenkins, ensuring smooth releases via Release Lifecycle Management.

Cloud Support Engineer

Aug 2022 - Jun 2025

- Client : *Daimler*

Key Responsibilities:

- **Application Development & Support:** Designed and maintained full-stack applications by integrating React-based frontend with Python (Flask/Django) backend and databases.
- **API & Database Management:** Developed and optimized RESTful APIs with ORM for MySQL, PostgreSQL, and DynamoDB to support business processes.
- **Cloud Operations:** Deployed and supported scalable applications on AWS (EC2, S3, RDS, IAM, CloudWatch), ensuring availability and reliability.
- **Security & Compliance:** Implemented IAM, RBAC, token-based authentication, and encryption to enforce access control and data protection.
- **CI/CD & Infrastructure Automation:** Automated deployments with GitHub Actions, Docker, Kubernetes, and Terraform, reducing deployment time by 40%.
- **Monitoring & Troubleshooting:** Performed proactive monitoring, log analysis, and debugging, reducing production incidents by 30% and improving SLA adherence.
- **Performance Tuning:** Enhanced system efficiency with multiprocessing in Java and Python, achieving <200ms API response under load.
- **Cross-Functional Collaboration:** Partnered with frontend, QA, and operations teams to deliver reliable, secure, and high-performance applications.

EDUCATION

Alagappa Chettiar Government College of Engineering and Technology

Bachelor of Engineering - 7.85

Aug 2018 - May 2022

- Graduated with honors

SKILLS

- **Programming Languages:** Python, JavaScript (ES6+)
- **Frameworks & Technologies:** React.js, Node.js, Flask
- **Databases:** SQL, NoSQL
- **Cloud Platforms:** AWS (EC2, S3, RDS, IAM, CloudWatch), Azure
- **Version Control & CI/CD:** Git, Bitbucket, GitHub Actions, Jenkins, Docker, Terraform
- **Tools:** JIRA, Eclipse, VS Code
- **Methodologies:** Agile, Scrum
- **Other Skills:** RESTful API Development, Security & Authentication (IAM, RBAC, Token-based), Testing & Debugging, Monitoring & Troubleshooting, Release & Deployment Automation
